Professional Summary

Full-Stack / Backend Developer with 3 years of professional experience building scalable web applications, REST APIs, AI-powered assessment systems, and cloud-based applications. Experienced in React.js, TypeScript, Node.js, Fastify, Express.js, PostgreSQL, MongoDB, Firebase, and GCP. Hands-on experience with AI integrations, authentication and authorization, API security, automated testing, CI/CD, cloud services, and performance optimization. Experienced in building recruitment, candidate management, and AI-driven assessment platforms.

Technical Skills

- **Languages:** JavaScript, TypeScript, SQL
- **Frontend:** React.js, TypeScript, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, Fastify
- **Databases:** PostgreSQL, MongoDB, Firebase Firestore
- **Cloud & DevOps:** GCP, Firebase, GitHub Actions, Jenkins
- **AI & Integrations:** OpenAI, Whisper, Deepgram, SendGrid, OneSignal
- **Testing & Tools:** Playwright, Cucumber, k6, Postman, Swagger, Git
- **Core Concepts:** REST APIs, JWT Authentication, RBAC, API Security, CI/CD, Microservices, MVC, Caching

Professional Experience

Tadpul Technologies Private Limited

Software Engineer

Aug 2025 – Present

Remote, India

- Engineer and maintain full-stack features for the NeoRecruit AI-powered recruitment platform using React.js, TypeScript, Firebase, Firestore, and Firebase Cloud Functions across candidate, recruitment, assessment, and administrative workflows.
- Build React.js and TypeScript frontend components integrated with Firebase Cloud Functions for candidate management, job workflows, scheduling, candidate evaluation, results, and administrative operations.
- Integrate OpenAI, Whisper, and Deepgram for AI conversations, speech-to-text processing, transcript generation, and automated candidate assessment workflows.
- Leverage Firebase Authentication, Firestore, Cloud Storage, and Cloud Functions for authentication, data processing, assessment workflows, and cloud-based application functionality.
- Strengthen application security through improved authentication and authorization, Firestore security rules, restricted Cloud Storage access, server-side file validation, API rate limiting, audit logging, secure credential management, and controlled assessment access.
- Automate end-to-end quality assurance with Playwright and Cucumber across 80+ recruitment, candidate, assessment, and administrative scenarios.
- Maintain CI/CD workflows using GitHub Actions and Jenkins, troubleshooting Node.js environments, automated browser tests, file uploads, dependencies, and CI-specific test failures.

Xforia Technologies Pvt Ltd

Software Engineer

Jul 2024 – May 2025

Chennai, India

- Engineered scalable backend services with Node.js and Fastify, reducing API response times by approximately 40% while supporting 10K+ daily active users.
- Architected multi-tenant backend capabilities for 50+ schools, enabling secure tenant-level data isolation across the platform.
- Supported secure platform access for 5K+ parent accounts through tenant-aware authorization and user access workflows.
- Enabled child application-access workflows allowing students to request temporary permissions through controlled parent and educator approval processes.
- Applied JWT authentication and granular RBAC across 5 user tiers, improving API access control and reducing unauthorized access attempts by approximately 95%.
- Optimized PostgreSQL databases hosted on GCP Cloud SQL through indexing, query optimization, schema normalization, and performance tuning.

DxMinds Innovation Labs
Software Engineer

Jun 2023 – Dec 2023
Bangalore, India

- Built backend services for Hallo Club and Cozmo using Node.js and MongoDB, improving request throughput by approximately 35%.
- Applied JWT authentication and role-based authorization across 5 user tiers, improving API access control and reducing unauthorized access attempts by approximately 95%.
- Documented 40+ REST API endpoints using Swagger and created technical documentation to improve API usability and developer onboarding.

Selected Projects

NeoRecruit – AI-Powered Recruitment & Interview Platform

2025 – Present

React.js, TypeScript, Firebase, Firestore, Cloud Functions, OpenAI, Whisper, Deepgram *Tadpul Technologies*

- Contributed to an AI-powered recruitment platform supporting job creation, candidate management, AI-led assessments, human-led sessions, results processing, and recruiter workflows.
- Implemented React.js and TypeScript features connected to Firebase Cloud Functions for candidate, job, evaluation, results, and administrative workflows.
- Connected OpenAI, Whisper, and Deepgram to enable AI conversations, speech recognition, transcript generation, and automated candidate assessment.
- Utilized Firebase Authentication, Firestore, Cloud Storage, and Cloud Functions for identity management, data processing, cloud storage, and application workflows.
- Strengthened application security by improving authentication and authorization, enforcing Firestore rules, restricting storage access, validating uploaded files, applying rate limits, securing credentials, and controlling assessment access.
- Created Playwright and Cucumber end-to-end coverage for recruitment, candidate management, assessment, and administrative workflows.

Parent Geenee – Mobile App Backend

2024

Node.js, Redis, PostgreSQL, Fastify

Xforia Technologies

- Implemented an OTP authentication system with Redis caching, reducing database calls by approximately 50%.
- Designed a scalable PostgreSQL schema and tuned backend operations to improve API response times and database performance.

Parent Geenee – School Dashboard

2024

Node.js, PostgreSQL, Fastify

Xforia Technologies

- Built a school management dashboard supporting 1,000+ students and staff with granular user permissions and CSV import/export functionality.
- Integrated 10+ dashboard capabilities through modular backend APIs, improving maintainability and simplifying feature integration.

Education

Prajna Institute of Technology and Management (JNTUK)

B.Tech in Mechanical Engineering

2016

Palasa, India

M.R.A.G.R. Govt. Polytechnic (SBTET)

Diploma in Mechanical Engineering

2013

Vizianagaram, India
